

DILLINGHAM AIRPORT MASTER PLAN UPDATE

Join us for a Virtual Public Meeting

The Alaska Department of Transportation & Public Facilities (DOT&PF), with funding support from the Federal Aviation Administration (FAA), is updating the Dillingham Airport (DLG) Master Plan. The last Airport Master Plan was completed in 2005 and no longer serves as a timely guide for airport improvements.

The updated Airport Master Plan will provide a plan for capital improvements, maintenance, and operations of DLG over the next 15-20 years to continue to serve the City of Dillingham and surrounding communities.
